CYT SERVICE

CYT Service in the multiple inspection by professional team, the electronic and paper version are used for double record, so that our oversea clients can authorize us to take in charge of the whole process. To bring our clients more convenient, better quality and more guaranteed all-round service experience. The quantity of Inspection Service by our professional team reach more than 5,000 thousand square meters per year.

PRE-SALE SERVICE

Communication

According to drawings and dimensions provided by clients to review and optimize with our engineered department. Providing the best purchasing offer to our clients obtain competitive price in local market.

SELLING SERVICE

Professional Team, Multiple Inspections

Multiple inspections not only ensure that the products are in A-grade, but also conduct independent inspection to intercept the defective productions. Communicate with clients one to one for the minor defective products in advance to ensure that clients can efficiently buy in satisfaction.

Note : We will reserve more 20 – 30 mm for slabs while ± 2 mm factory standard for processing.

Supervise Loading

There is a supervisor taking responsible for following up the whole loading for each container, including video record, photos record, paper record, and live chat with our clients on site. All of the loading pictures and detail information will be sorted out and sent to clients on the same day.

AFTER SERVICE

We all support you by 24 hours wherever you are.

Q: Do you have stone glue, caulking agent, and other tools (such as glue hammer, scraper, etc) for paving?

A: Of course we have.

Q: Do you have sink, bathtub, faucet or other hardware?

A: Sure.

Q: Aren't you a factory in the field of engineered stone and processing? Why do you have these accessories?

A: You are right, we are specialized in stone panel and processing. But stone glue, antifouling agent, wash basin, faucet and other accessories are stone fittings needed for home decoration or engineering projects. For the convenience of our customers, if they don't want to purchase a variety of products from multiple suppliers, we can buy for them so that they can achieve one-stop procurement without wasting extra time. In addition, after the project is finished (like the floor or counter top are installed, etc), we will also give corresponding follow-up maintenance suggestions according to the actual situation, so that customer can use it more comfortably.

We would like to take the opprotunity and will do our best to be your best partner.
